

Watermelon/Coconut Treats

Take half of a small seedless watermelon and one to 1 ½ cups coconut milk and put into a blender - blend on high. If you are using a watermelon with seeds – just be sure to remove them first.

This recipe does NOT need to be exact. The watermelon to coconut milk ratio can be off and the recipe will still turn out delicious! Keep the sugar down by using unsweetened coconut milk.

Pour into treat molds (this recipe makes enough to fill a few molds depending on what you are using) alternatively, you can use ice cube trays or any other frozen treat mold.

If using silicone molds - it's best to put a cutting board, cookie sheet or other flat item underneath the molds or they flop around and liquid may spill out.

Set these in the freezer until frozen (best to freeze overnight).

Give to your dog(s) for a tail-wagging treat!

As with any treat – give to your dog in moderation (which can be hard when your Shelter Mutts are demanding more)!

**As with any dietary addition – it's always best to check in with your vet and see if any foods are off limits to your Shelter Mutt!
